

Bio MP™

5-3-2

A BIOPRO SOIL ADDITIVE

Benefits of Use:

- Promotes soil microbial activity
- Increases tolerance of multiple stresses
- Improves overall plant vigor
- Source of micronutrients
- Improves color

Problems Addressed:

- Thatch build-up on the surface or as a sub-surface layer

Bio MP is a unique soil additive that combines molasses with NPK and micronutrients to provide benefits to both soils and plants. APPLICATION INSTRUCTIONS:

Bio MP can be applied through fertigation, conventional spray, or root injection. It may be applied alone or tank mixed with other products. Shake well before using.

CONVENTIONAL SPRAY:

Apply 6 to 15 oz. diluted in 2 to 2.5 gallons of water per 1,000 sq. ft. (2 to 5 gallons diluted in 80 to 100 gallons of water per acre) per month. To maximize performance, rates may be split into weekly or bi-weekly applications.

ROOT INJECTION:

Dilution Rate: Mix 32 fl. oz. of Bio MP per 100-gallon tank. Apply as needed.

Operating pressure: 150 – 200 lbs PSI or ½ gal per 4 seconds

Area Method:

Trees: Apply 50 gallons of solution per 1,000 sq. ft. Inject 4-8 inches into the soil where the feeder roots typically occur. Begin injections 1-3 feet out from the trunk to avoid injury to large roots and work in a grid pattern away from the tree to within 2 feet of the drip line. Apply 1 pint (16 fl. oz.) of diluted solution per injection site at 18 inch spacing or ½ gallon (64 fl. oz.) of diluted solution per injection site at 3 foot spacing.

Shrubs: Apply 50 gallons of solution per 1,000 sq. ft. Inject one pint (16 fl. oz.) of diluted solution per injection site. Inject 4-6 inches into the soil with 18 inch spacing between injections.

DBH Method: Use the chart below to determine the volume of diluted solution to apply per inch of trunk diameter at breast height (DBH).

Tree Size (DBH Inch)	Diluted Solution / Inch DBH
Very Small (1-4")	0.5 gallon (64 fl. oz)
Sm (5-7")	1 gallon
Sm - Med (8-11")	1.5 gallons
Medium (12-15")	2 gallons
Med – Lrg (15-19")	2.5 gallons
Large (20+")	3 gallons

COMPATIBILITY: Perform a standard "jar test" to check compatibility with other products before mixing.
