ENDURANT hazmark

TURFPAIN.NET

PRODUCT DESCRIPTION

Endurant HazMark provides a distinct visual boundary that lasts on turf grass. This bright colorant is used for marking hazards on golf courses or wherever you need a strong visual line within a landscape. Made with organic pigments, **HazMark** is applied without the use of multiple cans and aerosol sprays, making **HazMark** the distinctively economical and environmentally conscientious choice. **HazMark** can last up to three months without need for frequent application, depending upon rate of growth, frequency of mowing, weather conditions and other variables.

APPLICATION & RATES

Shake and mix well. Mix desired color of **Endurant HazMark** at a rate of 10:1, water to **HazMark**. Apply product with spray equipment to give desired line or shape on turf or soil. Apply to a surface clear of debris and relatively dry so the colorant adheres properly to the desired area. Don't apply in the rain. Allow **Endurant HazMark** to dry for two to three hours to avoid tracking. **HazMark** will last several weeks, depending on weather and other conditions. The durability of **Endurant HazMark** may vary based on sunlight and vertical growth. Longevity of color can be enhanced by using a turf growth regulator to control vertical growth of turf, following the rates and instructions on the label of the chosen growth regulator.

Rinse all equipment directly after use and avoid application to areas where color is not desired. If accidental overspray occurs rinse immediately, preferably before product dries. (Endurant Turf Pigment Cleaner may be used for a nontoxic cleaning aid.).

BENEFITS

- Long lasting color
- Bright visual appeal
- Made with organic pigments
- Made with powerful binders made specifically for excellent adherence to turfgrass
- Decreases waste compared with spray can applications
- Environmentally beneficial compared with aerosol cans
- Economical
- Easy to apply
- Fast dry time
- Decreases need for frequent re-application

PRECAUTIONS

Keep Out of Reach of Children. If contact with skin occurs, wash with soap and warm water. If contact with eye occurs, flush with large amounts of water for 15 minutes and seek medical attention

STORAGE

Store in a cool, dry location and tightly capped. Avoid freezing.
