NET WEIGHT 20 LBS. (9.08 KG)

New Lawn Starter Fertilizer

New Lawn Starter Fertilizer

New Lawn Starter Fertilizer

Covers Up To
5,000 Sq. Ft.

DIRECTIONS FOR USE

We recommend **ferti•lome® NEW LAWN STARTER FERTILIZER** because our many years of experience have proven it to be especially useful for getting new lawns growing vigorously and for promoting rich green grass.

1. WHAT IS THIS PACKAGE FOR?

ferti•lome® NEW LAWN STARTER FERTILIZER provides an excellent source of the guaranteed plant nutrients needed in new lawns for vigorous, rich green growth.

2. HOW DO YOU USE IT?

Apply 4 lbs. per 1,000 sq. ft.

FOR NEW LAWNS – SEED BED PREPARATION:

- A. Work soil 3-5 inches deep to proper grade to insure good drainage . . . a prong rake is ideal for this purpose. Avoid leaving low areas in the lawn where water may stand.
- B. Apply **ferti•lome® NEW LAWN STARTER FERTILIZER** using Spreader Settings in the table below. Work **ferti•lome® NEW LAWN STARTER FERTILIZER** into the top 2-3 inches of soil.
- C. Seed uniformly at the rate suggested on the seed package. Best results can be obtained when seed is applied with a fertilizer spreader. If desired, mix seed with clean top soil, sand, vermiculite or other carrier for a uniform application. After seed application, cover the seed to a depth of ¼ inch . . . turning a flexible tine rake upside down and dragging lightly across the seeded area is ideal for this purpose.
- D. Water gently . . . the secret to successful seed germination is to water gently (not wet) until seeds germinate.

FOR NEW LAWNS – SODDED AND SPRIGGED PREPARATIONS:

- A. Work the soil 3-5 inches deep to a proper grade. Apply **ferti•lome® NEW LAWN STARTER FERTILIZER** using the Spreader Settings in the table below and work into the top 2-3 inches of the soil.
- B. Sod or sprig as desired.
- C. Water thoroughly after sodding or sprigging. Keep soil constantly moist for several weeks after application or until new grass is securely rooted. Do not keep soil saturated with water.

APPLICATION EQUIPMENT AND INSTRUCTIONS

This product can be applied with a drop or broadcast (rotary) spreader. For best results, apply this product evenly and uniformly over the turfgrass (lawn) area avoiding streaking, skips or overlaps.

Before each application, determine the correct amount (lbs.) of product to place in the spreader hopper for the area to be treated. For example, if the label states to apply 4 lbs. per 1000 sq. ft. and your area is 2000 sq. ft, then place 8 lbs. of product in the hopper and set the spreader setting at 4 1/4 (per table below) if using an Accugreen drop spreader.

A more uniform application can be made by spreading one-half of the recommended amount of this product over the turfgrass area and then applying the remaining one-half of this product at a right angle to the previous application direction.

NOTE: The spreader settings listed below are approximate. The speed at which you walk and the working condition of the spreader will affect the rate of application.

| Spreader | Spreader Settings |
|---|-------------------------------------|
| | 4 lbs. of product per 1,000 sq. ft. |
| Scotts®/Republic Accugreen (Drop) | 4 ¼ |
| Scotts®/Republic Speedy Green (Broadcast) | 3 ¾ |
| ferti•lome®/Earthway Ev-N-Spred (Broadcast) | 14 |

NOTE: Keep fertilizer away from shrubs and tree trunks. Not recommended for container grown plants.

3. HERE ARE THE RESULTS YOU MAY EXPECT!

When used as directed, **ferti•lome® NEW LAWN STARTER FERTILIZER** will help grasses develop good root systems quicker and thus allow grass to grow faster and provide a rich green lawn.
