

DIMENSION[™]0.125% Plus Turf and Ornamental Fertilizer

For season-long control of crabgrass and control or suppression of listed annual grasses and broadleaf weeds in ornamental landscape areas, established lawns and ornamental turf, including golf course fairways, roughs and tee boxes.

A Selective Preemergent Herbicide Plus Fertilizer Combination Product that Provides Control of Crabgrass and other listed Weeds in Established Lawns and Ornamental Turfgrasses and Residential Landscapes. · Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.

• For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns

In the state of New York this product may be applied only by commercial applicators at a minimum of 200 lb (0.25 lb of active ingredient) per acre (4.6 lb per 1.000 sg ft) and no more than 400 lb (0.5 lb active ingredient) per acre (9.2 Ib per 1000 sq ft) per year. Use of this product in Nassau and Suffolk Counties of New York is prohibited. Active Ingredient:

Dithiopyr: 3,5-pyridinedicarbothioic acid, 2-(difluoromethyl)-4-(2-methylpropyl)-6-(trifluoromethyl)-S,S-dimethyl	
ester0.125%	
Other Ingredients 99.875%	

Uther	Ingrealents	<u>99.875%</u>
Total .	-	100.000%
This p	product contains 0.0625 pound of the active ingredient dithiopyr per 50 pound bag.	

KEEP OUT OF REACH OF CHILDREN CAUTION

FIRST AID lold eye open and rinse slowly and gently with water for 15-20 minutes. f in eves Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eve Call a poison control center or doctor for treatment advice. f inhaled Move person to fresh air If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. HOT LINE NUMBER

lave the product container or label with you when calling a poison control center or doctor or going for treatment. You nay also contact 1-800-424-9300 day or night, for emergency treatment information.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUSES EYE IRRITATION. HARMFUL IF INHALED. Avoid contact with eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact while handling this material may cause allergic reaction in some individuals.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Use with care when applying to turf areas adjacent to any body of water. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Do not contaminate water when disposing of equipment washwaters.

Notice: Read the entire label. Use only according to label directions. Before using this product, read Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies at end of Directions for Use. If terms are unacceptable, return at once unopened.

In case of emergency endangering health or the environment involving this product, call 1-800-992-5994. Agricultural Chemical: Do not ship or store with food, feeds, drugs or clothing.

Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling

STORAGE AND DISPOSAL

Do not contaminate water, foodstuffs, feed or seed by storage or disposal

PESTICIDE STORAGE: Store this product only in its original container in a dry, cool, secured storage area. PESTICIDE DISPOSAL: Wastes resulting from the use of this product that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticide disposal or in accordance with applicable Federal. State or local procedures.

CONTAINER HANDLING: Non-refillable container. Do not reuse or refill this container. Offer for recycling if avai able, or dispose of empty bag in a sanitary landfill, or by incineration or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Use Directions for Turf

LESCO Dimension 0.125% Plus Turf and Ornamental Fertilizer provides season-long control of crabgrass and control or suppression of other listed annual grasses and broadleaf weeds in established lawns and ornamental turfs, including golf course fairways, roughs, and tee boxes. When used according to label directions, this product will not harm nearby established ornamentals identified as "Tolerant Ornamentals" elsewhere in this label.

Use Precautions for Turf

This product may be used on seeded, sodded, or sprigged lawns and ornamental turfs that are well-established. Initial application of this product should be made only after turfgrasses have developed a vigorous root system, a uniform stand, and have received at least two mowings following seeding, sodding, or sprigging. Use of this product on turfgrasses that are not well-established, or weakened by stress from weather, pests, disease, chemical, or mechanical influences, may increase the chances of turf injury. Sweep any product that lands on driveway, sidewalk, or street back onto lawn and garden.

Apply this product only to turfgrass species listed on this label. The following turfgrass species are tolerant to this product when applied as directed.

Cool-Season Grasses

Common Name	
bentgrass, creeping †	Agrostis stolonifera
bluegrass, Kentucky	Poa pratensis
fescue, fine ††	Festuca rubra
fescue, tall	Festuca arundinacea
ryegrass, perennial	Lolium perenne

Warm-Season Grasses

Common Name	
bahiagrass	Paspalum notatum
bermudagrass	Cynodon dactylon
buffalograss †††	Buchloe dactyloides
carpetgrass	Axonopus affinis
centipedegrass	Eremochloa ophiuroides
kikuyugrass	Pennisetum clandestinum
St. Augustinegrass	Stenotaphrum secundatum
zoysiagrass	Zoysia japonica

† Use of this product on certain varieties of Creeping Bentgrass, such as 'Cohansey', 'Carmen', 'Seaside', and Washington' may result in undesirable turfgrass injury. Not all varieties of Creeping Bentgrass have been tested. Do not apply this product to Colonial Bentgrass (Agrostis tenuis).

tt Use of this product on certain varieties of Fine Fescue may result in undesirable turf injury. The following Fine Fescue varieties have been found to be sensitive to this product: 'Atlanta' 'Banner' 'Beauty' 'Bilgart' 'CE-2' 'Enjoy' 'HF-93', 'Highlight', 'Ivalo', 'Jamestown', 'Koket', 'Majenta', 'Mary', 'Pennlawn', 'Tamara', 'Tatjana', 'Waldorf', and 'Waldina'. Not all varieties of Fine Fescue have been tested.

ttp://poince.com/product/ansatz/an grass is fully green and has established new roots.

Note: it is not possible to evaluate all turfgrass varieties for tolerance to this product. It is suggested that the user evaluate the response of turfgrass varieties not listed on this label on a limited area, at specified use rates, prior to initiating large-scale use.

Precautions for Reseeding, Overseeding, or Sprigging

 Reseeding, overseeding or springing of areas treated with this product within 10 weeks after a single application of this product or within 16 weeks after a split application program totaling 9.2 lb/1000 sq ft (0.5 lb active ingredient per acre) or more may inhibit the establishment of desirable turfgrasses.

. When reseeding or overseeding, follow established cultural practices for seedbed preparation, seeding, irrigation, and fertilization.

· For best overseeding results, use mechanical or power seeding equipment (slit seeders) designed to provide good contact between soil and seed.

Precautions for Control of Craborass

Early postemergence weed control with this product is limited to crabgrass. Postemergence application effectively controls crabgrass, but only if application is made prior to the 3-leaf stage of growth or first tiller. For best results, cultural practices that disturb the soil, such as core-, spike-, or hydro-aerification, and verticutting, should be done before application of this product. Do not apply this product until turfgrass has recovered from the mechanical injury caused by these cultural practices.

Use Restrictions

• Do not use clippings from treated turf for mulching around vegetables or fruit trees. • Do not allow people or pets to enter treated area until dust has settled. • Do not graze livestock or feed forage cut from areas treated with this product.

Application Directions for Turf

Apply LESCO Dimension® 0.125% Plus Turf and Ornamental Fertilizer with equipment that provides a uniform particle distribution. Calibrate application equipment prior to usage. Avoid streaking, skips, or excess overlap during application

Preemergence Application Rates, Frequency and Timing

For preemergence grass and broadleaf weed control, apply LESCO Dimension® 0.125% Plus Turf and Ornamental Fertilizer as single or sequential application at 200 to 400 pounds (0.25 to 0.5 lb active ingredient) per acre. Applicators may choose to make a single application or sequential applications at 200 to 400 pounds per acre at 5 to 10 week intervals based on one or more of the factors listed below. Avoid streaking, skips, or escess overlap during application

- Length of residual weed control desired
- Height of turf (lower cut turf may require higher use rates)
- · History and success of weed control at the application site (use higher listed application rates if herbicide treatment history is unknown or weed control was poor with previous applications)
- Exposure to high temperatures and heavy rainfall or irrigation (this will shorten the residual preemergence performance)
- On turf sites adjacent to hard surfaces including driveways, sidewalks, and parking lots where residual activity may be reduced
- · Some target weed species (such as but not limited to Poa annua, goosegrass and sandbur) will require higher use rates

Tips for Improved Weed Contro

· For best results, apply this product within 2 to 3 days after mowing and delay mowing again for 2 to 3 days a the application

 The turf herbicide and fertilizer components in this product are not effective until activated by rainfall or irritation Performance is improved if application is followed by ½ inch of rainfall or sprinkler irrigation. Erratic weed con may result if not activated by rainfall or irrigation with 30 days after application.

Maximum Use Rates (Applies to all Turfgrass Uses)

• Do not apply more than 400 lb (0.5 lb active ingredient) per acre (9.2 lb per 1000 sq ft) per application. • Do not apply more than 6 times per year and do not apply more than 1200 lb (1.5 lb active ingredient) per a (27.6 lb per 1000 sq ft) per year if using split or sequential applications.

• To minimize the potential for turfgrass injury, do not make additional applications within five weeks of a previ application

• In the state of New York, this product may be applied only by commercial applicators at no more than 400 lb Ib active ingredient) per acre (9.2 lb per 1000 sg ft) per year. Use of this product in Nassau and Suffolk counti New York is prohibited.

Control of Crabgrass

Preemergence and Early Postemergence Applications from Late Winter through Summer

. This product provides "pre-emergence" control of crabgrass in established turfgrasses (including the large, smooth, and southern species) when applied prior to germination and emergence of crabgrass at use rates fi 200 to 400 pounds of product (0.25 to 0.5 lb ai) per acre.

• This product also provides "early post-emergence" control of crabgrass in late spring or early summer if appli prior to the 3-leaf stage of growth or first tiller as described below. This stage of growth generally corresponds time when crabgrass seedlings first become visible in the established turfgrass. The practical benefit of early emergence crabgrass control is a 2-4 week longer period of time (window of application) during which crabgras control can be achieved.

Fall Applications

This product can also be applied in the late summer through early fall (late August through November) at use from 200 to 400 pounds per acre to provide control of crabgrass through the early part of the next spring. Fal cation of this product may be followed by an appropriately timed application in the following spring for season control of craborass

Weeds Controlled or Suppressed

APPLICATION INSTRUCTIONS AND EQUIPMENT

This product may be applied with drop or rotary-type spreaders designed to apply granular herbicides. For best results, apply this product evenly and uniformly avoiding streaking, skips or overlaps. Avoid the use of spreaders that tend to apply granules in narrow rows or concentrated bands. Calibrate the spreader according to the manufacturer's directions. Initial spreader settings may require adjustment to deliver the specified application rate under actual application conditions. The desired calibration setting may be marked or recorded for future reference. Apply this product uniformly over the treatment area. More uniformity of application can usually be achieved by applying one-half of the required amount of product over the treatment area and then applying the remaining one-half in a different direction (e.g., at a right angle to the previous direction). Avoid streaking, skips, or overlaps during applica-

Check equipment frequently to verify calibration and proper functioning.

Use Directions for Landscape Ornamentals

LESCO Dimension 0.125% Plus Turf and Ornamental Fertilizer provides preemergence control or suppression of listed annual grass and broadleaf weeds in plantings of ornamental plants listed on this label. This product may be applied in ornamental gardens, parks, golf courses and residential areas where ornamental plants are grown for aesthetic purposes. Apply this product with a properly calibrated spreader that will provide uniform particle distribution. Follow instructions in the "Application Instructions and Equipment" section above.

Use Rates

This product may be applied as a single application or split application. Split or sequential applications may be used to provide improved weed control or to provide extended weed control in areas with long growing seasons. To make a split application, divide the rate in the following table into separate applications made 5-10 weeks apart. Sequential applications may be made in the late summer following a spring application or in the spring after a fall application, provided maximum application rates per year given below are not exceeded.

Pounds of Product/Acre	Pounds of Product/1000 sq ft	Pounds of Product/100 sq ft †
400	9.2	0.92 (14.7 oz)

†Rate based on an area of 100 sq ft for treatment of small areas.

Maximum Use Rates

• Do not apply more than 400 lb (0.5 lb active ingredient) per acre (9.2 lb per 1000 sq ft) per application. • Do not apply more than 6 times per year and do not apply more than 1200 lb (1.5 lb active ingredient per acre

(27.6 lb per 1000 sq ft) per year if using split or sequential applications.

• To minimize the potential for plant injury, do not make additional applications within five weeks of a previous application

• In the state of New York, this product may be applied only by commercial applicators at no more than 400 Ib (0.5 lb active ingredient) per acre (9.2 lb per 1000 sq ft) per year. Use of this product in Nassau and Suffolk counties of New York is prohibited.

Application Timing and Restrictions

LESCO Dimension 0.125% Plus Turf and Ornamental Fertilizer is effective as a preemergence herbicide, but will not control established weeds. Applications to mulched areas or bare ground must be made prior to weed seed ger mination. The best weed control is obtained when applied to soil that is free of clods, weeds, and debris such as leaves. Existing weedy vegetation may be controlled by hand weeding, cultivation or using postemergence herbicides prior to application.

Tips for Improved Weed Control

• The herbicide and fertilizer components in this product are not effective until activated by rainfall or irrigation. Performance is improved if application is followed by 1/2 inch of rainfall or sprinkler irrigation. Erratic weed control may result if not activated by rainfall or irrigation within 30 days after application.

· Avoid disturbance of treated areas. Loss of weed control may result if the treated soil surface is disturbed by soil mixing or tillage.

Use Precautions

. To avoid foliar damage to ornamentals, irrigate immediately after application to remove any herbicide granules adhering to foliage

Use Restrictions

· Do not apply this product directly to bare roots of ornamental plants as injury may result.

• Do not incorporate this product into soil. Dilution of active ingredient and possible injury to plant roots may occur. • Do not apply to soil around ornamental plants that are under stress resulting from drought flooding, excessive fer tilizer or soil salts, wind injury, hail, frost damage, winter injury, injury from previously applied pesticides, or damage due to insects, nematodes, or disease.

· Do not apply under conditions that would affect uniformity of application or distribution on the soil surface. Uneven product distribution will result in uneven weed control. Application under windy conditions can result in uneven distribution or cause herbicide granules to drift from the intended treatment area.

• Apply this product only to established ornamentals.

· Do not use on food producing trees and ornamentals.

Weeds controlled or Supressed

Used as directed, LESCO Dimension 0.125% Plus Turf and Ornamental Fertilizer will control crabgrass and control or suppress other listed grass and broadleaf weeds when applied prior to their germination.

Refer to "Use Directions for Turf" section for a complete listing of weeds controlled or suppressed. This product will not control established broadleaf weeds or grasses, except for crabgrass in early stages of development. The area to be treated should be free of weeds prior to application

Tolerant Ornamentals

The ornamentals listed below have shown tolerance to this product when applied according to directions in this label. However, this product has not been tested on all ornamental species, all cultivars of species on this label, or under all possible growing conditions. For species or cultivars not listed, only treat a few plants in a limited area and

Tolerant Ornamentals

trumpet flower, evening

The ornamentals listed below have shown tolerance to this product when applied according to directions in this label. However, this product has not been tested on all ornamental species, all cultivars of species on this label, or under all possible growing conditions. For species or cultivars not listed, only treat a few plants in a limited area and observe for tolerance under local growing conditions prior to large scale use.

Common Name	Botanical Name	Tolerant Cultivars
oak, laurel	Quercus laurifolia

Terms and Conditions of Use

If terms of the following Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies are not acceptable, return unopened package at once to the Seller for a full refund of purchase price paid. To the extent permitted by law, otherwise, use by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer, Inherent Risks of Use, and Limitations of Remedies.

Warranty Disclaimer

Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. To the extent permitted by law, SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY

Inherent Risks of Use

It is impossible to eliminate all risks associated with use of this product. Plant injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperature, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, tornadoes, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of the Seller. To the extent permitted by law, all such risks shall be assumed by buyer.

Limitation of Remedies

2

To the extent permitted by law, the exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to, at Seller's election, one of the following:

- Refund of purchase price paid by buyer or user for product bought, or
- Replacement of amount of product used

To the extent permitted by law, seller shall not be liable for losses or damages resulting from handling or use of this product unless Seller is promptly notified of such loss or damage in writing. To the extent permitted by law, in no case shall Seller be liable for consequential or incidental damages or losses.

The terms of the Warranty Disclaimer, Inherent Risks of Use, and this Limitation of Remedies cannot be varied by any written or verbal statements or agreements. No employee or sales agent of Seller or the Seller is authorized to vary or exceed the terms of the Warranty Disclaimer or this Limitation of Remedies in any manner.

Information concerning the raw materials composing this product can be obtained by writing to: LESCO, Inc., Attn: RA Dept., 1385 East 36th Street, Cleveland, Ohio 44114-4114, referring to the item number found on this bag.
