

Calcium Chloride De-icer with MCI3 & CMA

**NO NITROGEN OR
PHOSPHORUS ADDED**

**FAST ACTING
FORMULATION**

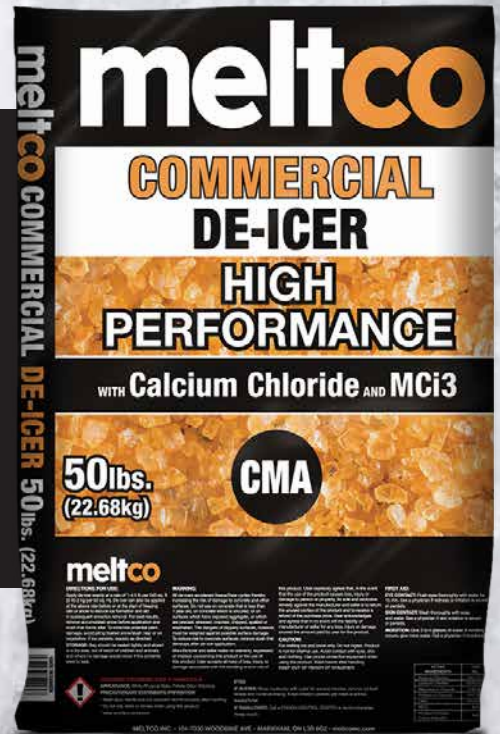

GENERATES HEAT

- Enhanced with MCI3
- Ideal for Spreading
- Works in Very Low Temperatures
- Non-caking
- Non-tracking
- Biodegradable Orange Color Indicator

meltco™ Commercial

This fast acting Calcium Chloride formulation has been designed to perform quickly and more effectively in very cold temperatures than most ice melting products on the market. meltco™ Commercial de-icer is an exothermic product which creates heat when comes in contact with snow and ice. The non-caking formula along with anti-corrosion additives make the product last longer and easy to use. Each granulation of meltco™ Commercial is encapsulated with MCI3 solution. The MCI3 solution is formulated with CMA and organic elements extracted from sea water. Its natural ability along with minerals and micro nutrients buffers the effects of chlorides on vegetation and environment. meltco™ Commercial de-icer has no nitrogen or phosphorus added to make it an ideal snow and ice melting solution around any body of water.

Active Ingredients
Sodium Chloride
Calcium Chloride
Magnesium Chloride
Potassium Chloride
CMA
MCI3
Product Contains Color Indicators
