

SPEEDS UP THE REMOVAL OF SLUDGE AND MUCK NATURALLY

Years in development, MICROBE-LIFT/SA speeds the biological removal of slow to degrade organic waste matter from aquatic pond bottoms that may become toxic to fish and plant life.

As organic solids accumulate on the pond bottom they begin to break down, releasing toxic gasses to the surrounding environment. These gaseous by-products endanger fish, marine life and plants.

MICROBE-LIFT/SA removes bottom organic sludge and muck, reducing or eliminating the potential harmful gaseous compounds, and helps to clarify your pond water at the same time.

MICROBE-LIFT/SA contains natural cellular matter, select biological accelerators and special microbes proven effective in pond sludge reduction.

- Provides "rapid & natural sludge and muck removal"
- 80% faster than competitive products
- Reduces and binds phosphate
- Helps improve pond clarity
- 100% active ingredients
- Disperses quickly
- Organic and microbial based
- Bio-degradable

BEFORE

AFTER

ESPECIALLY HELPFUL FOR PONDS THAT HAVE A ROCK OR GRAVEL BOTTOM AND WHERE VACUUMING IS IMPRACTICAL

NET 32 FL. OZ./946 mL
SHAKE WELL BEFORE USING

MICROBE-LIFT/SA is formulated specifically for the removal of organic bottom solids that are slow to degrade.

Works faster at warm water temperatures, however may be used effectively at any temperature year-round.

Recommended for use with all MICROBE-LIFT bacteria and enzyme products.

DOSAGE RATES

Basic application rates = one ounce per 100 gallons of pond water

Size of pond In gallons	First application	Maintenance: Once a week for next four weeks
80 - 2,500	2oz./100 gal.	1oz./100 gal.
2,501 - 5,000	1.75oz./100 gal.	1oz./100 gal.
5,001 and up	1.5oz./100 gal.	1oz./100 gal.

Maintenance: Treat with MICROBE-LIFT/SA monthly or as necessary thereafter.

Any change in pond water color after application will normally dissipate within 2 days.
