NUTRALIME - the soil treatment that creates the best growing environment for greener lawns & gardens!

Fertilizers and acid rain often cause an acid soil environment that can affect plant growth. Many soils are naturally acidic. Acid soil prevents growing plants from effectively using the available nutrients in the soil.

NutraLime is non-toxic and dust-free. It dissolves immediately to reduce soil acid and bring soil pH levels into proper balance. All successful lawns and gardens need proper pH control as an important part of their maintenance program.

Apply any season for beautiful lawns and gardens.

ADVANTAGES:

- Easy to use.
- Neutralizes acidic soils fast.
- Non-burning. Completely safe to spread at any time.
- Increases nutrient availability.
- Stretches fertilizer dollars.
- Creates the best growing environment for your lawns and gardens.

DIRECTIONS FOR USE:

NutraLime is non-burning and is non-toxic to humans, animals, and plant life, when used according to label directions. To determine the NutraLime requirements of your lawn or garden, a simple pH soil test is suggested. In the absence of a test, the following recommendations should be followed. For best results, water the soil well after a NutraLime application.

New Lawns: Apply 40 lbs. of NutraLime per 1,000 square feet and rake lightly into the soil before seeding.

Established Lawns: Apply 12 lbs. of NutraLime per 1,000 square feet. For clay soils, increase the spreader setting to apply 18 lbs. per 1,000 square feet.

Maintenance applications should be repeated 1-2 times per year, or whenever soil pH drops below 6.3, at a rate of 4-6 lbs. of NutraLime per 1,000 square feet. NutraLime may be applied with any lawn spreader at the same time as fertilizer applications.

Corrective applications should follow the New Lawn Directions for Use.

Gardens: Gardens have a deeper root zone than lawns and therefore require a higher rate. For the best results, double the lawn recommendations and mix to a depth of 6 inches.

FINENESS OF GRIND:

Prior to pelletizing or testing by wet sieve method:

Minimum Passing	U. S. Standard Sieves
100%	8 & 20 MESH
98%	40 MESH
94%	50 MESH
85%	60 MESH
70%	100 MESH

APPROXIMATE SPREADER SETTINGS

Spreader Make	10#	20#	40#
Scotts Accugreen (Drop)	8	13	18
Scotts Speedy Green (Cyclone)	6	11	16
Craftsman Broadcast	3	6	9
Craftsman Drop (20')	4 1/2	7	10
Earthway Broadcast	10	18	26
2 Wheel Cyclone	3	5	9

NOTE: These settings are only approximate. Age and condition of the spreader may cause variations.

GUARANTEED ANALYSIS:

Calcium (Ca)	20.0%
Magnesium (Mg)	12.0%
Calcium Carbonate (CaCO ₃)	50.0%
Calcium Carbonate Equiv. (CCE)	97.0%
Calcium Oxide (CaO)	28.0%
Magnesium Carbonate (MgCO ₃)	41.76%
Magnesium Oxide (MgO)	19.92%

Moisture content does not exceed . . . 1.0%

Derived from Dolomite.

ALSO CONTAINS NON-PLANT FOOD INGREDIENT: 2% lignosulfonates as Water Soluble Binder.

Pennsylvania, Ohio: ENP = 1,800 lbs.
Missouri: ENM = 630 lbs./Ton
Iowa: Iowa Secretary of Agriculture Certified 1,500 lbs. ECCE per ton
Florida: F1364; this material requires 1,858 lbs. to be equal to one ton of standard liming material.
Kansas, Nebraska, Oklahoma: ECCE = 75%
Minnesota: ENP = 82%
North Carolina: 1,886 lbs. of this material equals one ton of standard agricultural liming material ENV = 76%
Tennessee: RNV = 88%
New York: Effective Neutralizing Value = 76%; 1.1 tons of material needs to equal one ton of material having 100% Effective Neutralizing Value.
Wisconsin: Neutralizing Index Zone = 80-89
Oregon: Lime Score = 95
Virginia: Effective Neutralizing Value = 76%

NUTRALIME is non-toxic to humans, animals & plant life.

For incorporation, after application, wet thoroughly 30 minutes before tilling.
