**DIRECTIONS FOR USE**

Apply only as directed during the growing season.

Use Contec DG<sup>®</sup> Dispersing Granule Technology 12-24-8 where a high phosphorus fertilization is desired or when iron and manganese are needed to help correct or prevent deficiencies during the growing season.

**For turf:**

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will also greatly reduce ball, shoe and mower pickup. Cold weather and/or cold water (lower than 45°F / 7°C) can result in slower particle dispersion.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appearance. This will occur even if immediate irrigation or rainfall occurs. Be sure to apply this product to dry turf only.

This product should be used when a soil test has been conducted, within the last 36 months, and the test indicates that the soil is deficient in plant available phosphorus or the intended use is for establishing grass or repairing damaged grass during the growing season in which the grass is established.

**Application Rates:**

- LOW: 3.13 lbs/1,000 sq. ft.
- MEDIUM: 4.20 lbs/1,000 sq. ft.
- HIGH: 5.21 lbs/1,000 sq. ft.
- HEAVY: 6.25 lbs/1,000 sq. ft.

**FLORIDA APPLICATIONS:**

We recommend that you follow the Florida Green Industries BMP's at [http://www.flaes.org/pdf/BMP\\_Book\\_final.pdf](http://www.flaes.org/pdf/BMP_Book_final.pdf)

We recommend that you follow the Florida Golf Course BMP's at <http://www.flaes.org/pdf/gtbp07.pdf>

Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

**For all applications:**

Immediately after application, for optimum results, apply a minimum of 0.2 inches of water to disperse the granules.

Recent research has shown that environmental buffers prevent pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.

**Storage and Use:**

- Store in a clean, dry place.
- Reseal opened bag by folding top down and securing.
- Use only clean, dry spreaders.
- Do not leave unused product in spreaders.
