SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

<u>CHEMICAL IDENTITY</u>	<u>SYNONYM</u>	<u>CAS NUMBER</u>	<u>CONCENTRATION (%)</u>
SODIUM NITRATE		7631-99-4	40-50%
POTASSIUM NITRATE		7778-80-5	1-10%
SOYBEAN MEAL		68308-36-1	40-50%

SECTION 4: FIRST AID MEASURES

IF INHALED:	Move to fresh air, keep comfortable, and seek medical attention if breathing becomes difficult or symptoms persist.
IF ON SKIN:	Wash affected areas with soap and water while removing and isolating all contaminated clothing. Seek medical attention if irritation persists or a rash appears. Wash contaminated clothing before re-use.
IF IN THE EYES:	Immediately flush with water for 15-20 minutes and seek medical attention.
IF SWALLOWED:	Rinse mouth. DO NOT INDUCE VOMITING unless directed by a medical professional. Seek medical attention if unwell.
SPECIAL TREATMENT:	None known
HEALTH HAZARDS:	See Section 11

SECTION 5: FIREFIGHTING MEASURES

EXTINGUISHING MEDIA:	Use media suitable for surrounding fire. No special media required.
SPECIFIC FIRE HAZARDS:	When heated to decomposition, this product will emit toxic fumes and oxides.
SPECIAL FIREFIGHTING PROCEDURES:	Wear full protective clothing and positive-pressure self-contained breathing apparatus (SCBA). Avoid generating dusts during fire suppression through the use of strong streams of fluid, chemical or gases as dust may become dispersed in air at combustible concentrations.

SECTION 6: ACCIDENTAL RELEASE MEASURES

SPILL / RELEASE PROCEDURES:	Do not create dust. Eliminate all sources of ignition and keep unauthorized personnel away. Dust suppression should be achieved before, and maintained during, cleanup. Contain material and place in containers and discard according to Federal, State and Local regulations.
ENVIRONMENTAL PRECAUTIONS:	Prevent spilled material from entering storm drains or water bodies. If material enters a waterway, notify the appropriate authorities.
PROTECTIVE EQUIPMENT:	Dust collection, handling, storage and waste equipment should be engineered and maintained to prevent the escape of dusts. Explosion relief vents are recommended for dust collection, handling, storage and waste equipment. Use only correctly classified electrical equipment. Wear PPE according to Section 8

SECTION 7: HANDLING AND STORAGE

Avoid creating or accumulating dusts during processing, handling, storing and application. Wash hands after handling material. Keep away from all sources of heat and ignition (sparks, flame, smoking). Good housekeeping practices should be maintained to remove dust accumulation from surfaces. Ensure all transfer and mixing equipment is bonded/grounded to eliminate static discharge. This material will burn if heated, and concentrations in air may become combustible and explode. Do not eat, drink or smoke while handling the material. Do not get in eyes or on skin. Do not breathe dusts. May form combustible dust during processing.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTIONEXPOSURE LIMITS:

The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

<u>HAZARDOUS COMPONENT</u>	<u>OSHA PEL</u>	<u>ACGIH TLV</u>
