UNMATCHED WEAR RESISTANCE | EASY TO USE RIGHT OUT OF THE BAG

THE FOUNDATION TO A BETTER INFIELD

CREATING A SOLID FOUNDATION

PITCHER'S MOUND. BATTER'S BOX. CATCHER'S BOX. BULLPENS.

No areas around the diamond or in the bullpen receive more wear and tear than pitcher's mounds, batter's boxes and catcher's boxes. It is crucial these areas be properly maintained to assure on-the-field safety and playability, pitch after pitch. Whether it is new construction, a renovation or post-game maintenance, more groundskeepers, volunteer coaches and parents rely on the lasting performance and durability provided by Turface Professional Mound Clay® and MoundMaster® Blocks, 5-Star™ Packing Clay and MarMound® All-Purpose Packing Clay®. The reason: the right foundation under foot gives athletes at every level of play the confidence to compete to the best of their abilities. And that foundation begins with the best clays in the industry.

PROFESSIONAL MOUND CLAY® RED

A premier, 100% virgin clay featuring high density for superior durability and unmatched wear resistance; also offers easy pliability and shaping on mounds or around home plate.

- Preferred by professional and college teams
- Available as a shredded clay or in pre-formed blocks
- Easy installation – ready right out of the bag
- High level of durability in a range of climates, to reduce wear across a variety of fields

5-STAR™ PACKING CLAY

A reliable, high-density mound and plate clay that's easy to install and maintain – at a competitive price.

- Clay-silt mixture bonds firmly and quick to help streamline installation
- Highly durable for long-lasting performance and wear resistance
- A good fit across different geographies and climates, and suitable for all levels of play

MARMOUND® ALL-PURPOSE PACKING CLAY®

An affordable sand/clay mixture for mound and plate construction and repair, or to amend sandy infields. Requires lower maintenance than high-clay products for easier management, especially helpful across multiple fields!

- Helps maintain moisture and firm up soft, sandy areas for safe footing and consistent play
- Easy-to-use material for fast installation and smooth shaping
- Saves time and reduces the amount of field care needed
- Outperforms other clays in its class
- Great for multiplexes – holds up over a series of games and fields

TURFACE® MOUNDMASTER® BLOCKS

These pre-compressed blocks have a high density for increased durability, yet are pliable, and are ready for use right out of the bag.

- 100% pure virgin clay delivers professional, long-lasting performance
- Sized right for building batter's and catcher's boxes and mounds from the ground up
- 8-block sets are packaged in watertight bags to retain proper moisture, and are available in red or gray

5-STAR™ PACKING CLAY High Performance at a Competitive Price – a premium clay that combines a professional look and reliable performance with easy installation and maintenance.

- Highly Durable and Easy to Maintain – stands up to high levels of ongoing wear, even with larger athletes
- High Density – red clay material with a high silt and clay content for strong bonding during installation
- Ready to Use – just open the bag, pour, and pack

TURFACE® MOUND CLAYS FOR INFIELD MAINTENANCE

Making routine repairs after a ball game can take as little as 10 minutes using the most pliable, easy-to-use clay in the industry—and the result is a professionally maintained and safe playing surface.

Improvement with Just 8 Blocks!

A package of 8 MoundMaster Blocks, placed on their side, can make a difference in the area in front of the rubber.

- 1 Remove all old clay material.
- 2 Replace with MoundMaster Blocks.
- 3 Tamp to proper level; topdress with Turface infield conditioner.

Repairing Holes on Mound or Plate

- 1 Remove loose material down to the clay layer. Wet and lightly scarify the surface.
- 2 Fill hole with Professional Mound Clay and tamp. Use a tool smaller than the hole.
- 3 Add more clay and use your tamper to level the surface. Cover with infield mix.
